

PE1651/IIIIII

Angela Visco Kaplan submission of 17 February 2018

I have been electroconvulsively shocked six times and forced to take the neurotoxic and poisonous neuroleptics Risperidone, Haloperidol, Aripiprazole lauroxil, Cogentin, Benztropine and Clonazepam against my will. I have neurological aids from vaccine induced Lyme disease. Any help you can provide will be greatly appreciated.
