Marius Romme MD submission of 01 February 2018

Dear members of the group of the petition in Parlement about reducing neuroleptic medication or getting of them.

In the book "living with voices" PccS Books Engeland 2009 telling 50 stories of recovery by the persons who recovered from their being hindered by hearing voices. In chapter 9 the number is summerized in which 44 persons hearing voices described their experience with neuroleptic medicaton. 30 of them stopped their medication because it did not help them and as a result they got back their emotions and functioned better.

12 of them still use some or sometimes neuroleptic medication. 6 out of these 12 explained how and why medication helped them.
